

Jon Bråte

Senior Researcher at the Norwegian Institute of Public Health
Associate Professor at the University of Oslo

Date of birth: 12.03.1983

Nationality: Norwegian

NIPH: <https://www.fhi.no/en/about/departments-and-centres/virology/jon-brate/>

UiO: www.mn.uio.no/ibv/english/people/aca/jonbra/index.html

GitHub: <https://github.com/jonbra>

ORCID: <https://orcid.org/0000-0003-0490-1175>

Current and previous positions

Senior Researcher, Norwegian Institute of Public Health, Norway (2024 – present)

Researcher, Norwegian Institute of Public Health, Norway (2020 – 2024)

Associate Professor, University of Oslo, Norway (2022 – present)

Senior Lecturer, Department of Biosciences, University of Oslo, Norway (2020 – 2021)

Researcher, Department of Biosciences, University of Oslo, Norway (2015 - 2019)

Post Doc, Department of Biosciences, University of Oslo, Norway (2012 – 2015)

Education

PhD, Department of Biology, University of Oslo, Norway (2008 – 2012)

Master of Science, Department of Molecular Biosciences, University of Oslo, Norway (2006 – 2008)

Bachelor of Science, Department Molecular Biosciences, University of Oslo, Norway (2003 – 2006)

Additional education

PRINCE2 7 Foundation Project Management course (2024).

Project Management for Post Docs by Institute for Co-creative Leadership, Ltd. (2013)

Development Program in Leadership by Institute for Co-creative Leadership, Ltd. (2012)

Courses in communication, teamwork and leadership by Scandinavian Training Design (2008 – 2009)

Visiting researcher & Collaborations

Visiting researcher at the lab of Iñaki Ruiz-Trillo, Institute de Biologia Evolutiva, Barcelona, Spain (2014)

Visiting researcher at the lab of Maja Adamska, Sars Centre, Bergen, Norway (2012)

Exchanging PhD at the lab of Mikhail Matz, University of Texas at Austin, USA (2010)

Grants and projects

- | | |
|------|---|
| 2025 | Frances and Augustus Newman Foundation: Analysis of viral agents in childhood leukemia (£14,000). My role in this project is to help design lab and bioinformatics protocols, as well as identification of viral agents in sequence data. |
| 2025 | European Commission: European Reference Laboratory (EURL) for food and waterborne viruses, 2026-2032. (€3.25 million). My role in this project is to implement tools for virus surveillance based on whole genome sequence data. |
| 2023 | Research Council of Norway (RCN): SICKSOIL: Linking Microbes, Organic Matter and Sick Soil Syndrome (€266.000). My role in this project is to investigate the diversity of viruses in various soil environments. |
| 2022 | ErC EU4Health: Development of NGS and bioinformatics tools for increased preparedness against infectious diseases (€1 million). |
| 2021 | ErC HERA Incubator: Method development and improved preparedness for future Covid-19 variants (€1.8 million). |

- 2019 RCN: Financial support for ERC Consolidator Grant application (€51,000).
- 2019 Invited to interview for ErC Starting Grant (June 2019).
- 2018 UNIFOR: Small grant for purchasing scientific equipment (€2,900).
- 2017 RCN: Mobility grant for PhD-students. Funding for my PhD student to stay at the lab of Iñaki Ruiz-Trillo at the Institut de Biologia Evolutiva, Barcelona, Spain (€5,800).
- 2017 Norwegian Academy of Science and Letters: Centre for Advanced Study (2019-2020). I am part of an international consortium of evolutionary biologists who recently was granted a two-year project on the concept of Evolvability.
- 2014 RCN: Young Research Talent grant (2015–2018). Three-year personal grant, including salary for a PhD-student (in total €786,000), for studying the role of non-coding RNAs in the evolution of animals (project nr. 240284).
- 2014 RCN: Mobility grant for post docs. Funding for a research stay in the lab of Iñaki Ruiz-Trillo at the Institut de Biologia Evolutiva, Barcelona, Spain (€9,500)
- 2011 RCN: Personal Post Doc grant (2012–2015). Three-year personal grant (in total €408,000) for studying the role of non-coding RNAs in the evolution of multicellularity (project nr. 213707).
- 2009 Molecular Life Science, UiO: Mobility grant for PhD-students. Visiting the lab of Mikhail Matz at the University of Texas at Austin (€2,800).

Commissions of trust

CAS Fellow: I was a Fellow at the Centre for Advanced Study (CAS) at the Norwegian Academy of Science and Letters (2019-2020). This is a part of the CAS project on Evolvability listed under Grants.

Marie Curie evaluator: The European Commission's Marie Skłodowska-Curie Individual Fellowships (2016-2018).

National Science Centre of Poland, grant reviewer: Reviewed a research proposal for the SONATA BIS-13 call (2023).

Peder Sather Center reviewer: Reviewer for the UC Berkeley Peder Sather Center grants (2019).

Board member, Department of Biology, University of Oslo, Norway (2012).

Peer reviewer for the journals Molecular Biology and Evolution, Scientific Reports, Proceedings of the Royal Society: Biological Sciences, BMC Plant Biology, Algal Research, European Journal of Protistology, Aquatic Microbial Ecology, Genes, IJMS and Applied and Environmental Microbiology. See my [reviewer profile on Web of Science](#).

PhD evaluation committee. I served as an external referee in a committee in 2017 for evaluating whether a PhD thesis was worthy of public defense. Institut de Ciències del Mar, ICM-CSIC, Spain.

Hiring committees. I served on several hiring committees for PhD and Post Doc fellowships at UiO and UiB.

Supervision of graduate students

Main supervisor: Eugenia Giovanna Grande (master, 2023 - 2025), Ina J. Andresen (PhD, 2015 – 2021), Arthur A. H. Blørstad (PhD, 2016 – 2019[†]), Hengyi Zhu (master, 2018 – 2019), Alexander H. Løvestad (master, 2015 – 2017), Shruti Mehrotra (master, 2015 – 2018). **Co-supervisor:** Tengjel Hvidsten Tjersland (2022 - 2025), Peter Arnesen (master, 2019 – present*), Renate M. Alling (master, 2017 – 2019), Øyvind S. Gulbrandsen (master, 2016 – 2018), Eirik Høy (master, 2015 – 2016), Line L. Røsæg (master, 2014 – 2016), Andreas Evenstad (master, 2014 – 2017), Ina J. Andresen (master, 2014 – 2015), Anders K. Krabberød (master, 2008 – 2010), Dan K. Ree (master, 2008 – 2010). [†]Deceased. *Not finished.

Teaching

Bioinformatics for Molecular Biology (MBV-INF4410/9410). I have organized and lead the course, in addition to giving lectures and teaching computer labs in analyzing genomics and transcriptomics data, basic Unix/command line, as well as basic Python and R programming.

Bioinformatics (BIOS3010). Teaching Unix, molecular phylogenetics and NGS analysis.

Genetics and Developmental Biology (BIOS3601). I teach Echinoderm development, animal organogenesis and Evo-Devo.

Special curriculum on the Evolution of Multicellularity. 2016. I organized a special curriculum on the subject of the evolution of multicellularity. Four students (one master and three PhD-students) participated. I formed the curriculum and participated in the oral examinations and grading.

Molecular Biology and Biological Methods (BIO2140). Organized the course in 2015, in addition to teaching wet labs and computer labs in environmental sequencing and transcriptomics. Was also involved in writing and grading the exams. 2009 – 2011: supervised colloquia and wet labs in molecular biology.

Elementary Biology (BIO1000). 2008 – 2010: Supervised lab work in genetics and phylogeny.

Classification and Phylogeny (BIO4210). 2008: Supervised lab work in molecular phylogenetic methods.

Experience with bioinformatics tools and methods

- **Genomic epidemiology** – Phylogenetic and phylogeographic analyses of virus genome data using tools such as Nextstrain, NextClade, TreeTime and BEAST.
- **Genomics** – various genome assemblers using both short- and long-read sequence data (e.g. Spades, Canu, Flye). Quality assessment, both of sequence data and assemblies (e.g. coverage, k-mer analysis, Kraken2, MetaBAT, BUSCO).
- **Transcriptomics** – Quality control of sequence data (e.g. MultiQC, Trimmomatic). *de novo* assembly using Trinity, reference assembly using HISAT2 or PASA. Small RNA mapping and analysis (e.g. using Bowtie1 and MirDeep2). Gene quantification using RSEM, HTSeq and Cufflinks.
- **Comparative transcriptomics** – Quality control of sequencing libraries using (sequencing depth, gene variation, PCA). Differential gene expression testing using DESeq2 and edgeR. Visualization of gene expression using heatmaps and gene plotting. GO-enrichment and orthology comparisons. Co-expression analysis and gene module identification with the WGCNA and Clust methods.
- **Molecular phylogeny and phylogenomics** – multiple sequence alignment with tools like Muscle and Mafft, alignment visualization and refinement using MacClade and Mesquite. Model selection (ModelTest). Phylogenetic analysis with tools like RAxML, Phylobayes and MrBayes.
- **Gene identification and annotation** – homology searches with Blast, gene prediction using Augustus and annotation with Transdecoder and phylogenetic analysis. Gene and isoform identification using Cufflinks. Ortholog/Paralog detection. Chimera detection using Blast and Chimera Slayer. Domain annotation using CD-search and InterProScan.
- **Protein structure analysis** – evolutionary comparisons of protein structure evolution using ConSurf and Pyre2 and visualization in PyMOL.
- **Programming.** I have extensive experience with the Unix operating system and command line environment. I run and adapt programs written in Python and Perl and I know basic Python programming. I am also experienced with the language R, and I prefer to work in R for instance for statistical analysis and visualization of genomic and gene expression data.
- **Automation/workflow managers.** I use Nextflow to write bioinformatics pipelines that can automate the steps involved in for instance genome assembly and analysis of viruses. These pipelines can be run locally or in HPC environments.
- **High-performance computing (HPC).** I have used HPC platforms for many years, in particular the Abel/Saga at UiO. I have experience from handling large datasets from Next Generation Sequencing projects, and know the challenges and pitfalls associated with data storage, backup, sharing, memory requirements and resource requirements in highly computer intensive projects.
